X-Guard Connectors

Use our X-Protect bollards to protect doorways, exposed corners and machinery. The black and yellow bollards also attract the fork lift driver's attention and act as guidance along traffic routes. If you have our machine guard system X-Guard installed, it is easy to integrate it with our X-Protect range.

The connection bollard comes in three heights to fit our most common panel options. Following on from the bollard you can then choose any configuration of X-Protect.

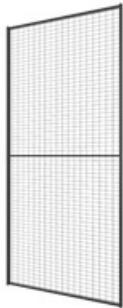

X-Protect is a unique approach to safety barriers. Unrivalled modularity, using only a few system components and damping that is built in to create a barrier system that changes with your work place. X-Protect allows rapid transformation, repair or replacement of existing barriers and bespoke configurations are limitless.
