SnapperWorks

SnapperWorks, simple and brilliant

Axelent's in-house developed, user-friendly drawing application, SnapperWorks, enables our customers to get a quick layout drawing of for example X-Guard. At the same time you draw the machine guard you can also choose to get a layout drawing including cable trays (X-Tray for X-Guard).

The benefits of SnapperWorks are many ...

- ▶ It is tailored to Axelent's modules and contains all our mesh panel, machine safety systems and X-Tray for X-Guard.
- ▶ It is easy to learn.
- ▶ The program enables you to import DWG and DXF files and draw, for instance, panels straight onto the drawing.
- ▶ From specified lengths you can let the program configure the most economical panel layout.
- ▶ It quickly provides you with a complete drawing including material specifications.

- ▶ Click and drag! It is that simple and quick to get an overview of what you need and what your mesh panel system will look like. The drawing can then be used as an order basis.
